PROJECTS

Hotel Reservation System — *Full-Stack Mobile & Web Project*
- Built a full-stack hotel reservation system: a Next.js web app deployed on Vercel, a Flutter mobile app for Android and iPhone, and a Supabase backend.
- Guests can search rooms with live availability, book with a timed hold, view their bookings, and use the app in English or Filipino; admins manage reservations from a staff portal.
- Enforced booking rules in the database so the web and mobile apps share the same logic.

Portfolio Website — *Web Project – Live on Vercel*
- Designed, built, and deployed a personal portfolio website using JavaScript to showcase projects and skills.
- Applied front-end layout and user-experience practices for a clean, easy-to-navigate interface.

E-Commerce Web App — *Web Project – React*
- Developed an e-commerce web application with React, building reusable components and product-browsing pages.

3D Customization App — *Mobile / Web Project*
- Built an interactive application that lets users customize a 3D item and preview changes in real time.

Pedometer Android App — *Mobile Project*
- Developed an Android step-counting app using Expo, applying mobile app development fundamentals.

Freelance Website — *Personal Project*
- Built a personal website to present my services and accommodate freelance web development work.

Restaurant Website — *Web Project*
- Built a restaurant website presenting the menu and key information for customers.

Palaba (Roblox Game) — *Game Project – In Development*
- Developing a Roblox game as a passion project; currently under development and not yet deployed.

WORK EXPERIENCE

Work Immersion Student *200 Hours*
Bicutan Parochial School *Taguig City, Metro Manila*

- Assisted in the installation of an RFID system for the school.
- Applied computer system servicing skills, including hardware and software setup, in a live school environment.
- Gained hands-on experience in troubleshooting and device configuration.
